Welcome to 3D Cellular

Home of the Wireless Automation Tools

3D Cellular is committed to developing the best and most current automation software for today's evolving mobile telecommunications networks.

We specialize in software tools designed by engineers for engineers, providing the most rapid, precise and efficient user interface available for collecting, analyzing and updating network data from *Alcatel-Lucent, Ericsson, Huawei, Nokia, Nortel* and *Samsung* wireless switches as well as other network elements.

3D Cellular tools can provide significant cost savings by facilitating and even automating many repetitive and time-consuming data management tasks, allowing engineers to focus on more important aspects of network operations. Past experience has proven that these savings will quickly cover the cost of the software and provide an ongoing return on your investment for years to come.

Benefits and features:

- **Data Collection Wizard** provides on-demand as well as scheduled data collections
- **Table Views** offer a comprehensive overview of network switch data
- **Compare, Query & Trace** current or archived data from multiple switches
- **Edit Data** within specialized, spreadsheet-styled editing windows
- **Automatic Script Generation** ensures quick and accurate network updates
- **Standardized GIU** for all vendors reduces training time for new and existing staff

Our flagship products, the *Digit Translation Tool*, the *Roam Translation Tool*, the *Media Gateway Tool* and the *Mass Update Tool*, were developed in collaboration with industry professionals throughout North America and the EU and are deployed for some of the world's leading wireless service providers.

After years of providing high-quality products and dependable service, **3D Cellular** is known around the world for excellence and reliability.
